

Pro-abortion Honesty?

A definition of insanity is thinking you can continue in the same pattern of sinful living and obtain different results.

Naomi Wolf is honest about what is the underlying motive of some, if not most, of pro-abortionists: self. Simply seeing this honesty, though, does not mean that we are being effective in convincing the pro-abortion thinker that life begins at conception, that life is sacred and that abortion is the taking of life. All these points have been conceded by many ‘thinking’ pro-abortion supporters..but still, it’s a choice, it’s the ‘supremacy of personal autonomy’..it’s the “we will not have Christ rule over us” mentality that must be addressed.
